

Ghiyath Abd Alrazzaq

Junior Mechanical Design Engineer | CAD/CAM Engineer

Damascus , Syria | ghiyath.gg.1@gmail.com | +963930348565 | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Motivated Mechanical Engineering graduate specializing in Mechanical Design, with hands-on project experience in CAD modeling, CNC machine design, and injection mold design. Proficient in SolidWorks and AutoCAD, with practical exposure to CAM programming, CNC machining fundamentals, and engineering drawing standards including GD&T basics. Strong foundation in mechanical assemblies, component selection, and design-for-manufacturing for both machined and molded parts. Seeking to bring strong design and analytical skills to a Junior Mechanical Design, CAD, or CAD/CAM Engineering role.

PROJECTS

CNC Machine Design & Fabrication Project | Graduation Project, Damascus University

- Designed the complete mechanical structure of a 3-axis CNC machine in SolidWorks, ensuring structural rigidity and dimensional accuracy.
- Selected, sourced, and physically assembled mechanical components — linear guides, lead screws, couplings, and stepper motors — based on load and precision requirements.
- Built and tested the complete physical machine, validating fit, motion clearance, and real-world manufacturability against the CAD design.
- Integrated a GRBL-based control system to enable G-code driven motion control.
- Applied CNC manufacturing concepts throughout the design and build process to ensure the machinability of all components.

Plastic Injection Mold Design Project | 4th-Year Academic Project, Damascus University

- Designed injection mold components — core, cavity, and parting line — for a plastic part using SolidWorks.
 - Studied PMMA material properties to guide material-specific design decisions, including shrinkage and tolerancing.
 - Evaluated mold design and manufacturing considerations such as draft angles, wall thickness, and part ejection.
-

SKILLS

- **CAD Software:** SolidWorks, AutoCAD
 - **CAM Software:** PowerMill, CAM Programming
 - **CNC Machining:** CNC Machining Fundamentals, GRBL Control Systems
 - **Engineering Drawing:** Technical Drawing, GD&T Basics
 - **Mechanical Design:** Mechanical Assemblies, Component Selection
 - **Manufacturing:** Injection Molding Basics, Design for Manufacturability
-

EDUCATION

- **BSc in Mechanical Engineering – Mechanical Design | Damascus University | 2026**
-

LANGUAGE

- Arabic — Native
 - English — Professional
-

PORTFOLIO
